

THE REPUBLICANS COMMEMORATE THE BIRTH OF LINCOLN—FOURTEEN YEAR OLD BOY PATENTS DEVICE NOW IN OPERATION AT MONTANA-TONOPAH SHAFT FOR SAFETY OF THE MINERS.

RUSH FOR LAND.

During the past week preliminary applications for the segregation of 95,000 acres of land to be reclaimed under the Carey act, were filed in the state land office. Eighty-five thousand acres of his land lies in Esmeralda county in the vicinity of Miller station, west of Tonopah, and the balance in the Las Vegas valley.

Included in the above mentioned 95,000 acres there has been a total of 270,000 acres applied for under

the Carey act to the state land office. Surveyor General Deady and assistants are busily engaged on this work and Mr. Deady states that the next several weeks will be taken up in the segregation.

The acquiring of land under the Carey act has met with general approval of the landholders in this state and as a result thousands of acres heretofore worthless will be reclaimed by settlers in this state. Under the Carey act all land taken up must be reclaimed and only the amount that can be supplied

with water can be acquired by the applicants. In most of the cases subterranean water courses are to be employed in the reclamation of the land and this idea, if successful, as it no doubt will be, will mean great strides toward the reclaiming of the arid lands throughout the state, especially in the southern and eastern parts.

With a householder and family on each 160 acres of this land that is being asked for under the above mentioned act, one can readily see what it is going to mean for the state of Nevada, not alone in taxable property but in population as well.

FINDS SUITABLE PLACE FOR HAND GRENADES

August Belmont in the smoke-room of the Lucitania told, apropos of luxurious motor cars, a story about the young Marquis of Anglesey, who died in Monte Carlo some five years ago. "Lord Anglesey's cars were the most luxurious then known," said Mr. Belmont. "This young man went to the extreme in everything. He was very intelligent, though. Once, at his historic castle in Wales, there was a slight fire. So, lest the priceless pile burn down, he ordered an enormous quantity of hand grenades, or extinguishers, from London. When the grenades arrived they were hung all over the castle, but, though it was an enormous place, there were still several dozen grenades left over at the end of the hanging. 'And what shall I do with them, my lord?' the butler asked. Lord Anglesey coughed—he was already in a pretty bad way—and said dryly to the butler: 'You may put them in my coffin.'"

BIG MULE HAS ACCIDENT AT SUTRO TUNNEL

One of the big mules used for transportation purposes in the Suro tunnel had a rather rough experience two days ago which was a different variety from the usual line of accidents which befall the livestock working underground. This animal tips the scales at 1,300 pounds, and while pulling out a train, with six other mules broke through a plank. The result was that the big fellow rolled over into the stove drain and became wedged in between the pipe and lagging, and between two fourteen-inch timbers, his natural position being reversed, all four legs pointing heavenward.

It required three hours hard work with six men, a chain block and tackle, wedges and blocks, to get his muleship onto his feet again. He showed the hardihood of his race, and immediately upon regaining his feet, started for the mouth of the tunnel, the glad sunshine having a special attraction about that time.—Virginia Chronicle.

ORE RECEIVED FROM PIONEER LEASING COMPANY

Two carloads of medium grade ore from the Pioneer lease was received Tuesday by the Western Ore Purchasing company and was being run through the sampler Wednesday. No information is given out as to its value as yet, and will not be until the returns are made to the lessors, and they publish the settlement figures. The ore will probably go about the \$50 to \$75 mark, however, as all their ore that runs much above that figure is sacked, containing as it does, much of the "fines" resulting from mine operations. The shipments are easily averaging 25 tons per day, and have been keeping up that average steadily for a long time.—Goldfield News.

WINGFIELD GIVES A FINE ELK'S HEAD

GOLDFIELD, Feb. 12.—Goldfield lodge No. 1072, B. P. O. E., boasts of the finest set of antlers in the United States, through the generosity of George Wingfield. George has had the set for two years, but no one thought he could be induced to part with them until the last meeting which was attended by Wingfield, when, in a neat little speech, he donated the magnificent head and antlers to the lodge that is favored with his membership. It is said that this was the first time Wingfield entered the lodge since his initiation and the boys are correspondingly proud of their acquisition. The gift is variously estimated to be worth from \$700 to \$1,000.
